

Technical Data Sheet
IPETHENE® 101
 Low Density Polyethylene

Product Description

IPETHENE® 101 is a low-density polyethylene film grade, produced by high-pressure autoclave technology.

Features:	<ul style="list-style-type: none"> No additives Good mechanical properties 	<ul style="list-style-type: none"> Excellent optical properties
Uses:	<ul style="list-style-type: none"> Agricultural films Flexible tubes 	<ul style="list-style-type: none"> Squeezable bottles Shrink films Liners
Processing Methods:	<ul style="list-style-type: none"> Blown film extrusion Blow molding 	<ul style="list-style-type: none"> Pipe extrusion

** Measured on 100 µm blown film, Blow-up ratio 2.5:1, output 10 kg/h, melt temperature ~210°C.

Processing Recommendations

IPETHENE® 100 can be easily processed on conventional extruders at melt temperature range 180-220°C. Due to differences in screw and die head designs, processing conditions should be optimized for each production line. With suitable equipment, it can be drawn down to 60 µm films.

Health, Quality, Regulations and Safety

This product is not classified as dangerous substance. Material safety data sheets, international standards certificates (e.g. ISO 9001) and other regulatory documents are available on our website. This product is not intended for use in medical or pharmaceutical applications and we do not support its use for such applications.
